

# POSTGRADUATE BULLETIN

ISSUE 52 | EUROPE UK | SEPTEMBER 2015

## We cannot recommend the **AAT QUALIFICATION** highly enough

Mrs Sonya Ashbarry, proprietress of Eagle Education & Training

AAT is one of the most practical qualifications available to people who are interested not only in getting into bookkeeping and accounting but also in increasing their effectiveness at the centre of a business. From their first day of training AAT students learn techniques

and processes that they can apply directly at work, covering important communication and interpersonal skills as well as accountancy. The students soon become rounded, effective and committed team players. We are continuing to recommend Eagle Education & Training to our non-apprentice AAT students. Eagle Education is a distance learning college specialising in accountancy courses, particularly AAT. Eagle's friendly staff are professional yet approachable, and their students enjoy a high level of success.

Interested? If so, send an email to [geoff.holding@ubteam.com](mailto:geoff.holding@ubteam.com) for course information.

## Are you unlocking your **POTENTIAL**?

Do you realise that you may have a hidden talent hitherto undetected? **FIND IT AND UNLOCK IT!** It's so true that everybody can do something and that nothing ventured is nothing gained. Instead of leaving your talent hidden in the earth why not dig it up, train it, use it, trade with it, live off it and derive lifelong benefits from it? If you are a school leaver this summer make sure you have discussed postgraduate studies with your parents, your local PSC and your prospective employer and then make sure you enrol in good time for the postgraduate course that most suits you.

## Tips from a **SUCCESSFUL STUDENT**

Wise advice is encouraging and needs to be followed, but the experience of those who have successfully followed wise advice is most stimulating! Listen to these valuable study tips from a successful student –

- Dedicate a definite, regular time and stand by it.
- Dedicate an undisturbed study spot and stay in it.
- Dedicate a personal achievable goal and stick to it.

## Do you have **CRIPPLING TAX BILLS**?

Many readers will remember this quotation: *"The business you're in [tax accounting]...is the best business you can be in... Simple people like us farmers...we need the best tax accountants we can get to get the best tax deductions that we can get."*

There is a continuing need for more students to study the tax laws of their own country, and to keep up-to-date with new tax regulations. Too many businesses unnecessarily pay too much tax. Tax regulations constantly change and a skilled company accountant or finance manager who keeps up-to-date is an invaluable asset to any business in order to give the best advice and save thousands of **€€€** or **£££** or **\$\$\$** or whatever currency you use for paying your tax. If you have not yet enrolled on a postgraduate course send an enquiry today to your postgraduate coordinator for details of taxation courses available.

## **DEDICATION** in France

Read these testimonials from two French students –

*'For several reasons I decided to enrol on the 2-year **BTS** Management des Unités Commerciales Course. The main reason was that I received direct counsel to take up postgraduate studies during a personal conversation. Secondly, I was counselled that this privilege is not available to all, and I should not ignore this most valuable opportunity to invest for the future. So I am now working in various roles in the family business and am also studying the **BTS** Course by distance learning with ICADEMIE, the online training provider. It is a challenge, but very rewarding!'*

*'For my postgraduate studies I chose an online course on e-commerce which I can study at my own pace. This course is very useful because I can put it into practice at work. I am convinced that studies after finishing school are essential for everyone because we still need to learn and we should never stop learning. It is very fruitful because I have discovered that skills learnt at school are developed during the course. After completing this training I will be responsible for monitoring customers on the website, using various methods to attract customers to order online, and exploring ways of tracking customer clicks to send individual promotional offers based on the products that I know they have looked at. This is a fascinating occupation and extremely satisfying when the customer sends us an order!'*

*"Success is not final, failure is not fatal; it is the courage to continue that counts."* [Winston Churchill]
